

ABOUT ME

I am an extremely emotional person, able to work successfully on my own, but I find that my potential is best expressed within a team. I have a remarkable capacity for learning and am excited by the unknown. I am passionate about technology and my curiosity drives me to always explore new frontiers. Through my past experiences, I have acquired solid work skills that allow me to successfully lead a small team, masterfully managing project phases. I have devoted my attention to the world of user experience (UX) for years and have been captivated by it. I am enthusiastic in applying all methodologies and paradigms that enable the development of innovative and engaging experiences.
